

Ask for MIN-AD

MIN-AD is a unique, natural feed supplement that is produced in the United States. It is extracted from our deposit in northern Nevada and processed at our plant nearby.

Backed by over 40 years of research and use, you can have confidence in the benefits MIN-AD brings to your dairy or feedlot operation.

A Quality Product

MIN-AD is both a buffer and a source of calcium and magnesium. It is the specialty mineral supplement backed by research and quality assurance. Ask for it by name!

**safe, high
quality** and
consistent
feed ingredient?

Adds Nutritional Advantage

MIN-AD

Adds Nutritional Advantages

AFIA Safe Food/ Safe Feed Certified

Our Winnemucca production facility has been certified under the AFIA Safe Feed/Safe Food program.

The Safe Feed/Safe Food program is the first of its kind to offer a pledge and a commitment to an extensive feed safety control program.

Safe Feed/Safe Food features are:

- Assessing and controlling hazards (biological and chemical)
- Tracing and tracking products
- Documenting and controlling processing and manufacturing

This certification requires rigorous on-site audits by independent third-party certifiers.

OMRI Certified

MIN-AD is certified for inclusion in the production of organic food by the Organic Materials Review Institute (OMRI). The primary mission of OMRI is to provide professional, independent, and transparent review of materials and processes to produce, process, and handle organic food and fiber.

OMRI is dedicated to providing a highly competent and scientifically defensible technical review process.

MIN-AD has been OMRI listed since January 2003.

MIN-AD, Inc.'s Quality Assurance

MIN-AD, Inc. focuses on the feed industry. We have a very comprehensive quality assurance program that is specifically tailored toward feed safety. This program includes:

- Educating our plant employees about the feed industry and the importance of feed safety
- Special mining techniques and ore control
- Meticulous inspection and cleaning procedures for our carriers
- Regular product testing
- MIN-AD is also certified to be free of dioxins and heavy metals.
